LETTER OF RECOMMENDATION

I am writing this reference letter in support of Ms. Annapoorani who is applying to the Master of Science program at your esteemed University. I have known Annapoorani in my capacity as her professor for two years now which, I taught her the courses “**Object oriented analysis and design**” and “**Information retrieval**” during her second and third year of Engineering. I am convinced that she would excel in this program and be a true asset to your University.

Early on I was impressed with Annapoorani’s knowledge of data structure, algorithms and technical understanding. Her ability to ask right questions and conduct her own research and studies out of the classroom, not only facilitate enriching discussions in the class but also reflected her potential for research. She keeps herself abreast with the latest developments and goes through various technical literatures which were evident from technical discussions. Annapoorani is a wonderful and talented technologist and her ability to translate abstract ideas into meaningful system components was truly invaluable.

On a personal level, Annapoorani is a well-rounded person with a lot of enthusiasm for sports and extracurricular activities. She is also shown his adeptness at organizational skills, especially in cross-cultured settings. She is approachable and easy to communicate with.

I have high respect for Annapoorani both personally and professionally and sincerely believe that she will bring her unique optimism and tireless creativity and passion in your class as well the University.

Regards,
Dr. B. Jaison
